From climate change denial to the rise of unfounded conspiracy theories - scientific consensus has been repeatedly manipulated, downplayed, or disregarded in favour of “alternative facts” for political capital.

On April 14<sup>th</sup>, 2018, people worldwide will head to the streets to demonstrate in support of science and research. This protest is nonpartisan and is not led by institutions.

**All are welcome - not just scientists.**

**Start: 13:00, Bockenheimer Warte**

**March: 13:30 - 15:00**

**Close: 15:00, Römerberg**
